SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the FPA (16 U.S.C.824a(e)).

On January 17, 2007 the Department of Energy (DOE) issued Order No. EA-315, which authorized BP Energy to transmit electric energy from the United States to Canada as a power marketer for a five-year term using existing international transmission facilities. That authority will expire on January 17, 2012. On October 31, 2011, BP Energy filed an application with DOE for renewal of the export authority contained in Order No. EA-315 for an additional five-year term.

The electric energy that BP Energy proposes to export to Canada would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States. The existing international transmission facilities to be utilized by BP Energy have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
